

PRESS RELEASE

REPLOID Group AG: Exhibitor at the BIOGAS Convention & Trade Fair in Nuremberg, Germany

- **REPLOID booth: Hall 08, Booth D06**
- **Sustainable recycling alternative for organic waste from food production**
- **Synergies from combining ReFarmUnits with biogas plants**

Wels, December 5, 2025 – REPLOID Group AG ("REPLOID") will be providing information at the BIOGAS Convention & Trade Fair on the use of insect larvae for the industrial recycling of organic waste from food production. In addition, REPLOID's fattening facilities (ReFarm Units) offer economic synergies when operated in the vicinity of biogas plants.

The BIOGAS Convention & Trade Fair is considered an important platform for innovation in the fields of renewable energy, bioeconomy, and sustainable material flow recycling in German-speaking countries. The REPLOID team looks forward to a professional exchange with visitors, biogas plant operators, project developers, farmers, and industry partners at booth D06 in hall 08.

About REPLOID GROUP AG

REPLOID Group AG ("REPLOID") produces premium proteins, lipids, and organic fertilizers derived from black soldier fly farming. At the REPLOID ReFarmUnits, rearing facilities built for its customers, young larvae supplied by REPLOID are fed customized blends of residual materials sourced from local food supply chains. Once mature, the larvae are collected by REPLOID for centralized processing and marketing.

Through large-scale industrial upcycling, REPLOID offers an economically viable and sustainable solution to advance the circular economy. The Group's business model enables efficient valorization of food residues and surplus food resources, sustainably supporting the preservation of vital natural resources.

Founded in 2020 and headquartered in Wels, Austria, REPLOID Group AG maintains a global focus and has been listed since July 2025 on the Vienna Stock Exchange's direct market plus segment (ticker: HRX5). The Group has approximately 80 employees.
